• ROUND THE CLOCK ROUND THE WORLD SERVICE •

## INTRODUCTION

Underwater Shipcare (Pte) Ltd, UWSC, is an independent Singapore based company specializing in providing underwater diving and maintenance service to the shipping industry in Singapore and the neighbouring countries with association with **eighty-eight** companies strategically located in all the main shipping ports of the world and provides a round the clock round the world underwater service from a single source.

## WORLDWIDE LOCATIONS

Alaska, Angola, Argentina, Australia, Bahrain, Belgium, Brazil, Bulgaria, Cambodia, Canada, Canary Islands, Chile, China, Croatia, Cuba, Cyprus, Denmark, Egypt, Estonia, Faroe Islands, Finland, France, Germany, Greece, Holland, Hong Kong, Iceland, India, Indonesia, Italy, Japan, Korea, Latvia, Malta, Mauritius, Mexico, Morocco, Netherlands, Netherlands Antilles, New Zealand, Nigeria, Norway, Pakistan, Panama, Papua New Guinea, Philippines, Poland, Portugal, Russian Federation, Sabah, Saudi Arabia, South Africa, Spain, Sri Lanka, Sweden, Taiwan, Thailand, Trinidad and Tobago, Turkey, United Arab Emirates, United Kingdom, U.S.A., Uruguay, Venezuela, Virgin Islands, Yemen.

## PRINCIPAL ACTIVITIES

### Hull Cleaning

Most of our work is carried out using the scamper system. This system has been specially developed for vessels coated with a **SPC or silicone** type anti-fouling and we can guarantee that we can remove the marine growth without damaging the all important paint surfaces underneath.

**This cleaning system has been approved by all the major paint companies.**

*Hull cleaning in operation*

*Propeller polishing*

### Propeller Polishing

Underwater propeller polishing and maintaining smooth propeller surfaces are now fully appreciated, but propellers do foul up and for this we use our **new improved THREE-STAGE** reconditioning system to achieve a Rubert finish **better than a** Rubert 'A' on the Rubert Comparator.

*Preparing for underwater video survey*

### Underwater Surveys

UWSC is formally approved by all leading classification societies for carrying out in-water surveys. During the course of the surveys, the divers are in constant voice communication with the attending Surveyors /Superintendent.

Apart from these surveys, we are regularly employed by shipowners and marine paint companies to carry out fouling and paint inspections and also pre-purchase and sale inspections.

### Underwater Blanking

From time to time sea valves give trouble and when it does happen, it is not always convenient to wait until the next drydocking. It is, therefore, essential that sea valves can be opened while the vessel remains afloat. For this, we use our own specially designed blanks to fit over the sea chests or overboard discharges. When the blanks are secured in place, this then enables the inboard crew to maintain or replace the sea valves as necessary.

### Cofferdam Insert Repair

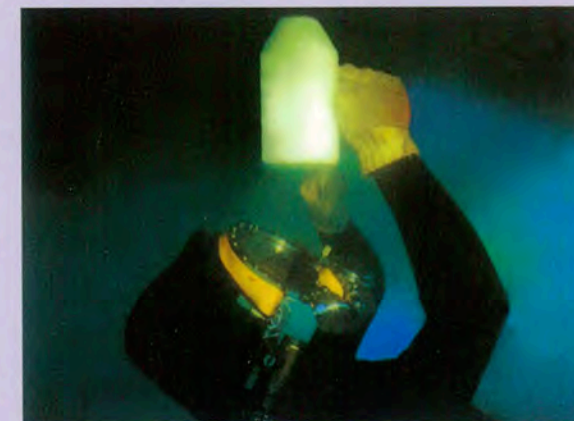

We are approved by all the leading Classification Societies for carrying out insert renewal repairs.

*Cofferdam in place*

*Underwater Photography*

*Ultra-sonic 'NDT' testing*

### Underwater Repairs

The company frequently undertakes a wide range of other underwater repairs from cutting and welding to drilling to sealing of stern tubes, replacing of sacrificial anodes, propeller trimming and balancing, and ultra-sonic 'NDT' testing of shell plating.

*Underwater Welding*

## REPORTING

On completion of any underwater operation, a detailed photographic report is always submitted.

## QUALITY, SERVICE & ASSURANCE

With a motto of "**We are big enough to meet the challenge and small enough to care**", and the fact that we are geared up to work seven days a week twenty-four hours a day, we are absolutely positive that we can offer the very best of service, safety and quality in Singapore and being independent, we can be more competitive when it comes to pricing without sacrificing the all important factor of quality.

## OUR MISSION

Our mission is not only to meet customers' requirements but to exceed their expectations.

To know more about UWSC or our other specialized underwater services or other locations, please do not hesitate to either phone, fax or email us your requirements.

**Ready to meet your requirements anytime anywhere  
LOOKING FORWARD TO BEING OF SERVICE**
