

Pilgrim's ABACUS Training Kit

The perfect training aid for maintenance teams or new recruits.

Lightweight, easy to handle, the ABACUS training kit can be used in either the workshop or training facility environment.

The ABACUS training kit provides the opportunity for pre-planned maintenance refresher training on the removal and installation of Pilgrim's Radial Fit Bolts, ensuring the maintenance team have the correct level of knowledge and procedures to carry out a successful task or for training new recruits as part of an induction.

The ABACUS training kit allows the training to be carried out at the maintenance teams convenience and with out need for access to the operational coupling, fully maximising the uptime of the asset.

The ABACUS training kit comprises of:

- Pilgrim Radial Fit Bolt assembly including a 1 x Bolt, 1 x sleeve and 2 x nuts
- Plinth mounted Steel Block to represent the coupling hole
- Full Bolt Tensioning kit
- Hydraulic Pump (Hand or Air Driven)

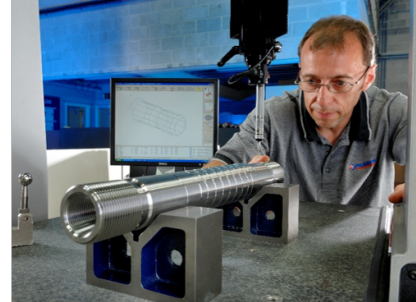

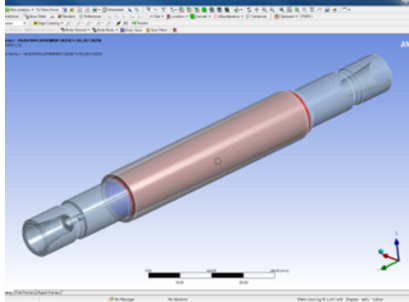

Benefits

- Off line Training
- Light weight
- Operator confidence
- Product Knowledge
- Protecting an asset

We Exist To Remove Uncertainty for Our Clients

Summary of Pilgrim's Service offer

Why our Service Offer is critical

Every industry has its unique challenges, but virtually all industries share the goals of increased machine uptime, reduced maintenance, improved safety, energy savings and lower Total Cost of Ownership. With expertise in a wide range of disciplines and decades of experience as a technical partner to both equipment manufacturers and end users in various industries, Pilgrim is delivering not just products but total integrated solutions that help our customers achieve their goals.

With over 60 years experience in Bolting & Positioning, Tensioning and Hydraulic Drive up, Pilgrim has developed a unique understanding of the importance of reducing down time by providing a high integrity and well thought out Service offer. We are pleased to summarise our Service Offer aimed to remove uncertainty for our clients:

Benefits

- One stop shop
- Quick
- Knowledge transfer
- Genuine spares
- Maintaining Safety

Our Service Offer:

- Certificated on site training, either class room or on the asset itself.
- In-situ coupling hole preparation including line boring, coupling spot facing and final dia. sleeve machining
- Bolts, Tensioning kit, Pumps and Pilgrim Nut assessment and refurbishment and re-test.
- Engineering support on fault finding including FEA capabilities.
- On site installation supervision, including procedures and methods documentation.
- Refurbishment, spares and replacement parts supply for our full range of products.
- Fast track spares to get the asset up and running
