SHIP BROKERS

COMPANY  
PROFILE

JANUARY 2026

# ABOUT BPCO

BPCO is a global maritime solutions provider, delivering integrated services and technologies to the shipping industry worldwide.

- ESTABLISHED IN 2006
- 40 FULL-TIME PROFESSIONALS
- GLOBAL PRESENCE & NETWORK

Your 360° Maritime Solutions Partner

## BPCO MILESTONES

BPCO L TD has established strong exclusive partnerships with top-tier organizations in the maritime sector, delivering premium services globally.

These collaborations emphasize BPCO L TD's dedication to high standards and excellence.

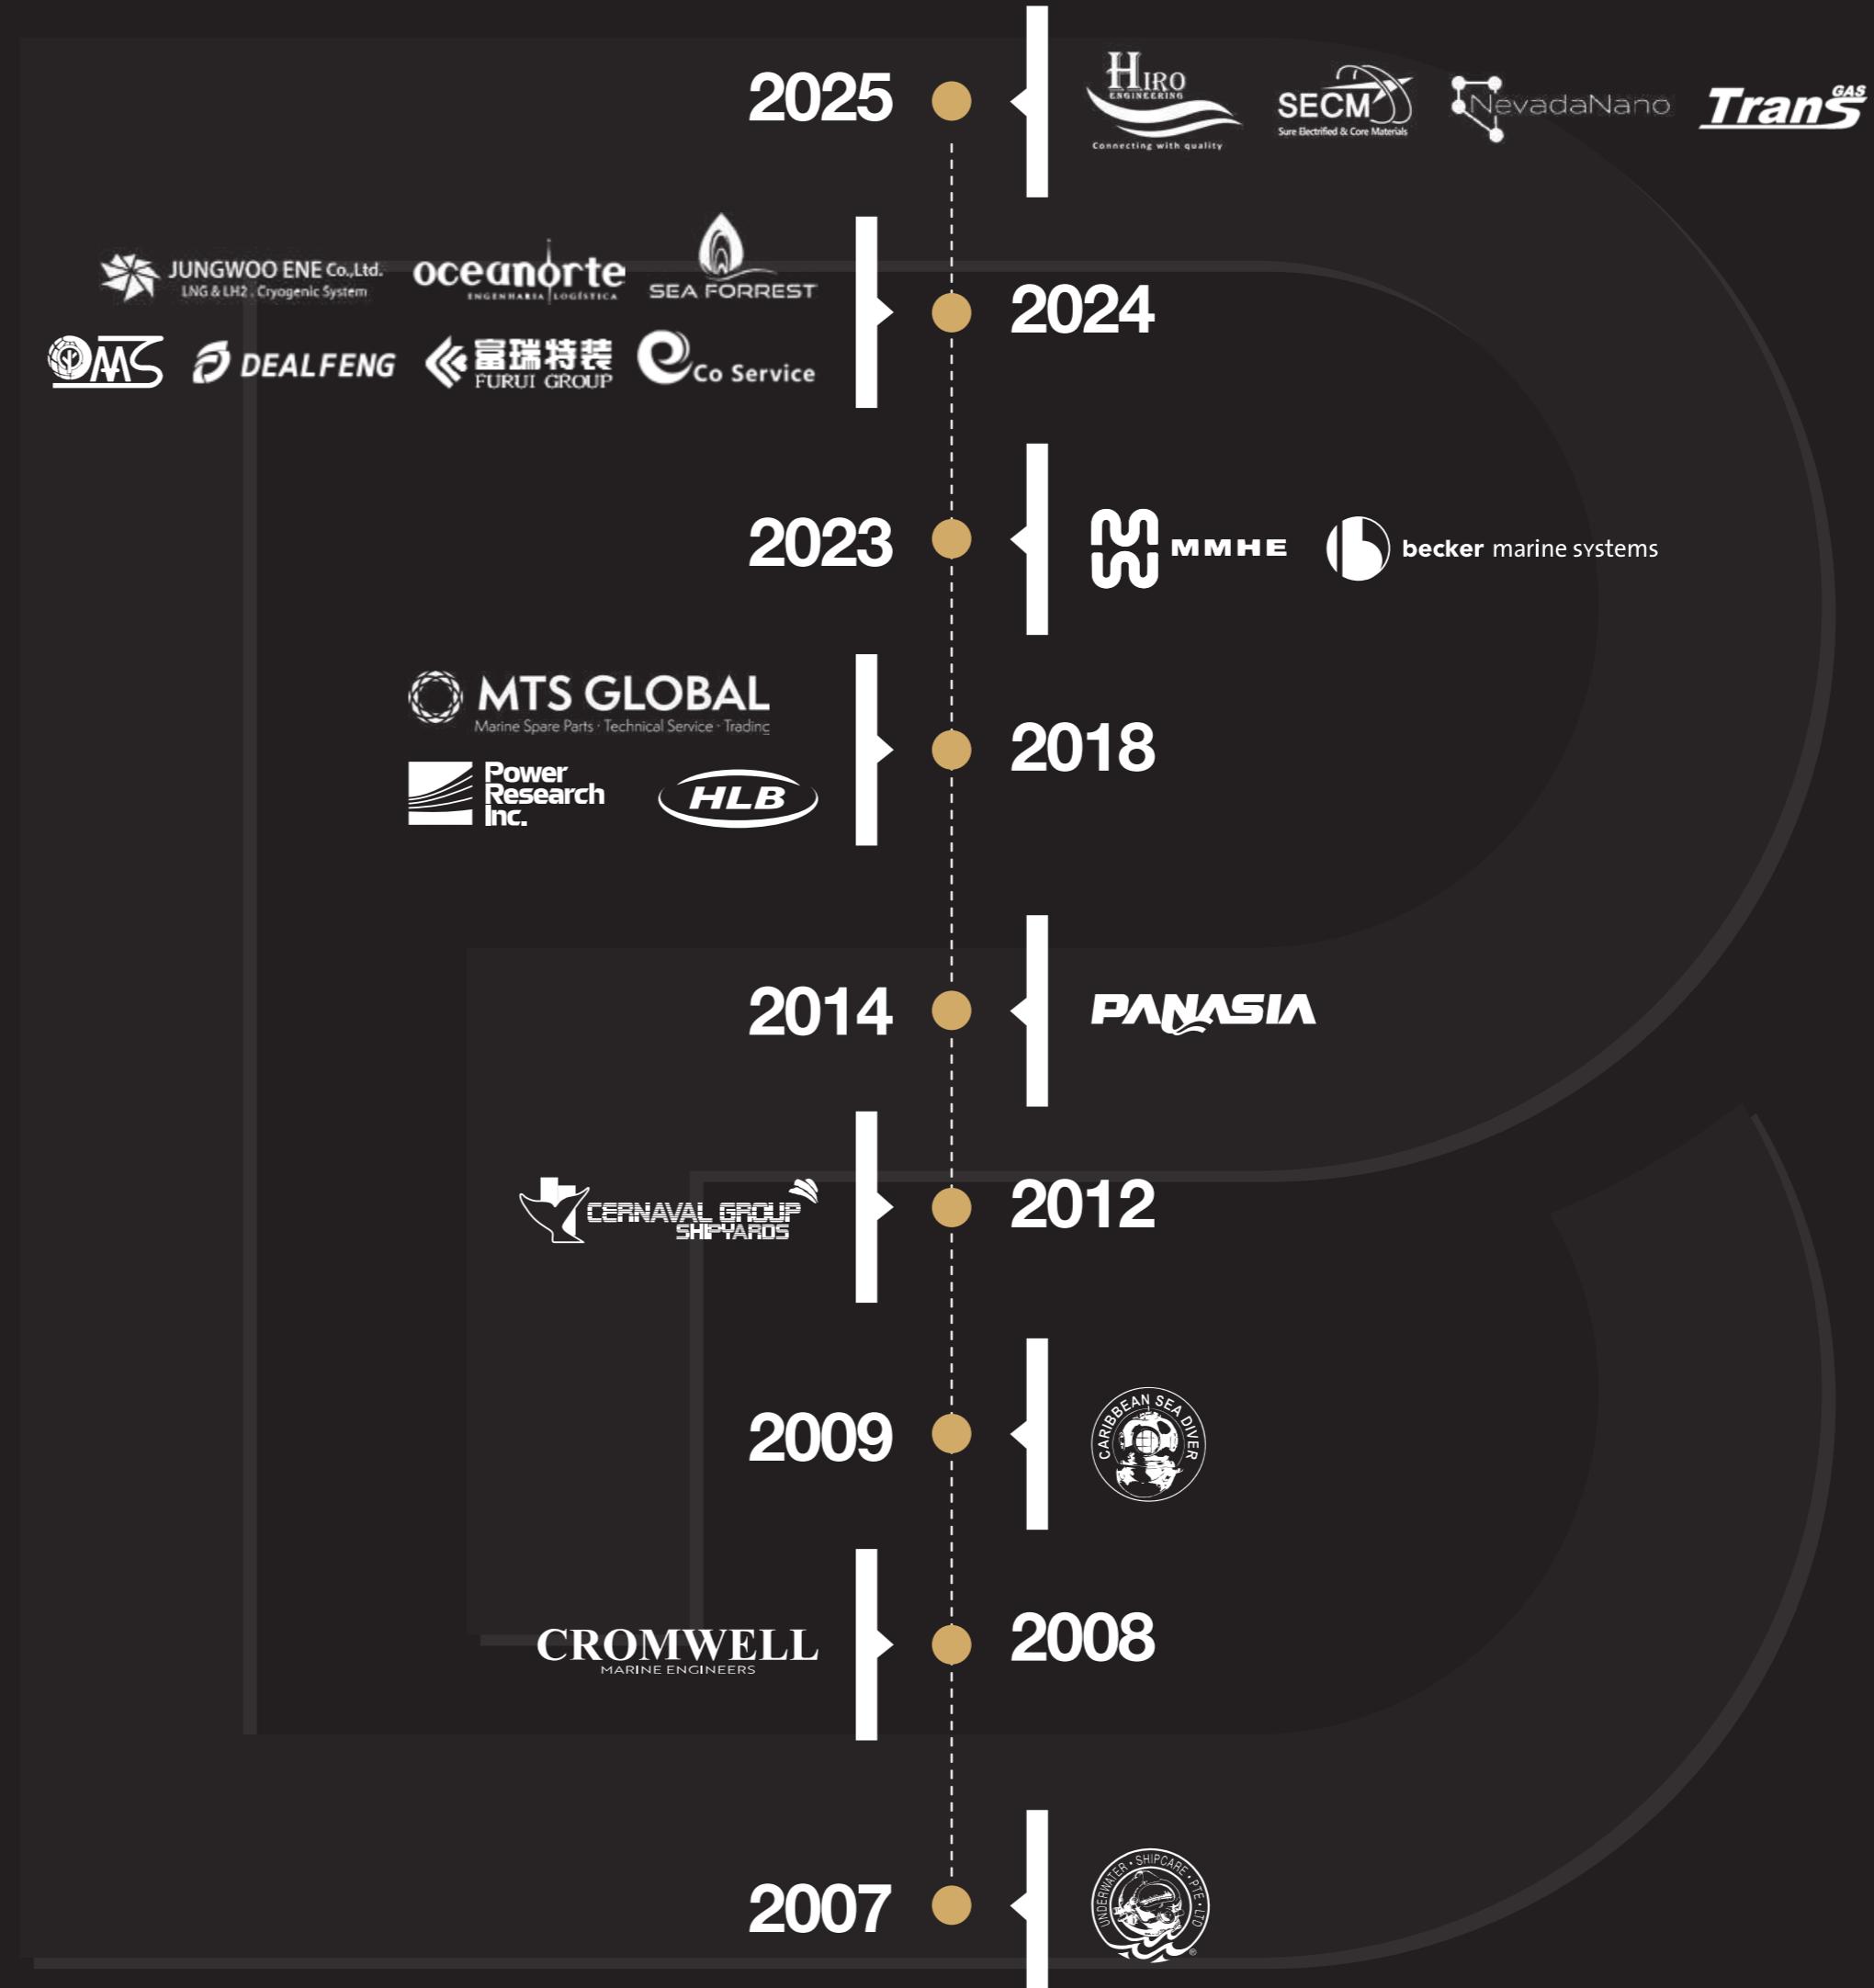

The company offers specialized services such as ship repair, navigation systems, safety solutions, and more. This diverse portfolio caters to the unique needs of each vessel, providing a comprehensive solution for maritime businesses.

Our commitment to innovation and technology ensures that you stay ahead in the evolving maritime industry.

Investments in cutting-edge equipment allow us to exceed client expectations.

We prioritize sustainability and environmental responsibility. Partnering with like-minded companies, the organization positively contributes to the global maritime community, aiming to preserve oceans for future generations.

We are committed to fostering a zero-waste future, we diligently pursue innovative strategies and collaborative initiatives to minimize environmental impact and maximize resource efficiency.

# Repairs Division

Malaysia Marine and Heavy Engineering Holdings Berhad (MHB) is a globally trusted energy and marine solutions provider for a wide range of offshore and onshore facilities and vessels.

MHB has 50 years of track record in delivering integrated and complex solutions to international oil & gas clients. Owns and operates the largest fabrication yard in Malaysia and Southeast Asia that is equipped with world-class facilities, MHB is recognised for its expertise in offshore deepwater fabrication, offshore conversion services and ship repair which include LNG carrier repair and dry docking. MHB also owns three dry docks which are amongst the largest dry docks in Southeast Asia.

MHB operates a regional Centre of Excellence – a learning centre that produces technically expert workers for the oil & gas and marine industries.

MHB acknowledges the importance of delivering solutions that are sustainable to our stakeholders, providing services that support the global energy transition in the areas of renewable energy, decarbonisation such as carbon capture facilities & energy efficiency.

# EXCLUSIVE REPRESENTATIVES

## CAPABILITIES & TRACK RECORD IN SUMMARY

Full range engineering, procurement, construction, installation & commissioning (EPCIC) services for offshore structures

Complete offshore facility conversion services in one location

Comprehensive ship repair, refurbishment, upgrading and life extension of various types of vessels and rigs

## FACILITIES

MMHE West and East Yard are situated in the Southern part of Malaysia, located in the state of Johor, 22 km from Johor Bahru & 27 km from Singapore.

The 2 fully equipped yards are well-positioned along one of the busiest ship- ping lanes of the South East Asia. We are strategically located at 41 km from Senai International Airport and only 4 km from Johor Port.

## MARINE REPAIR FACILITIES

FACILITIES	INFOS & DIMENSIONS	
Dry dock 1	385m x 80m x 14m	Capacity: 450,000 dwt
Dry dock 2	270m x 46m x 12.5m	Capacity: 140,000 dwt
Dry dock 3	350m x 80m x 14m	Capacity: 400,000 dwt
Land berth 1	345m	
Land berth 2	345m	
Shiplift	188m x 33.8m x 8m	
6 Quays/Berth	Up to 1.889m in lenght	8M Draft Average

Cernaval Shipyard is a private owned Shipyard, based at Algeciras Port Bay.

With 40 years of experience, large ship repair center has become one of the most important private ship repair and maintenance shipyards in Spain and part of Europe. Thanks to the perseverance and continuous investment not only in capital but also in effort of the Lopez family, the Group has been consolidating its position, becoming a reference in the Mediterranean and Strait of Gibraltar for the coming decades.

FACILITIES	DIMENSIONS
NEW FLOATING DOCK	230m x 39m
LAY BY BERTH	510m x 50m
GRAVING DOCK	400m x 50m
LAY BY BERTH	240m x 40m

# GREEN TECHNOLOGIES - NEW BUILDING EQUIPMENT

## BPCO AS NEWBUILDING CONTRACTOR

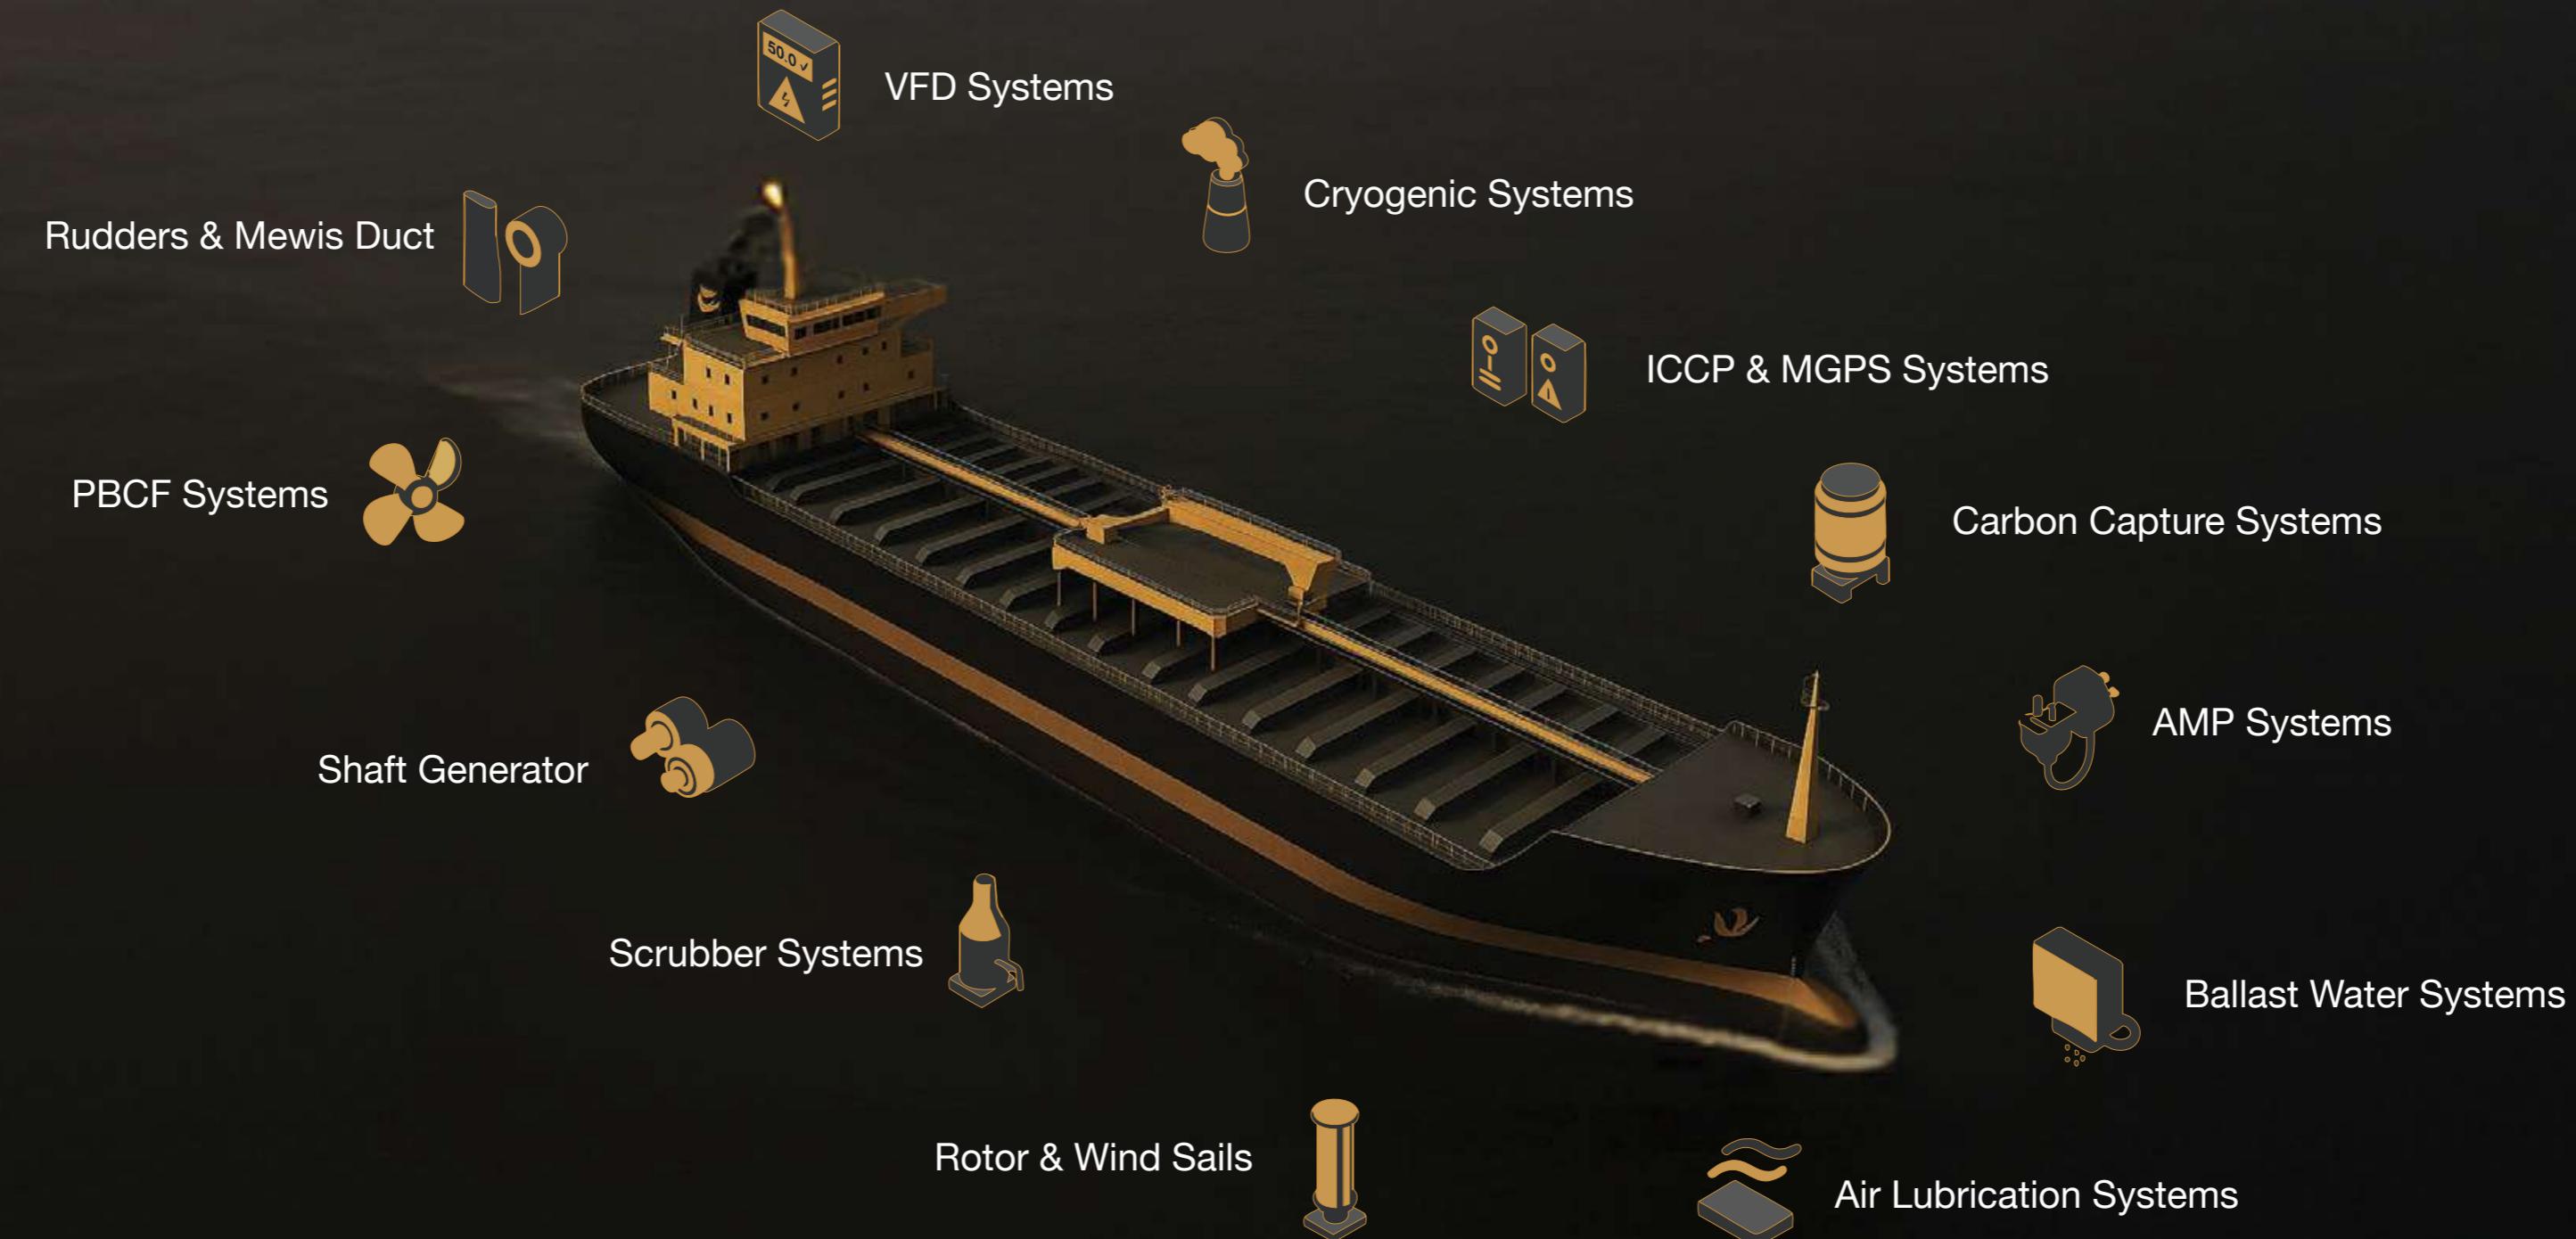

BPCO acts as Newbuilding Brokers, providing end-to-end advisory and brokerage services throughout the entire newbuilding process. We work closely with our clients to understand their strategic objectives and deliver tailored shipbuilding solutions that meet both commercial and technical requirements.

Leveraging our deep knowledge of the global shipbuilding market and our established relationships with leading shipyards, designers, financial institutions, and legal advisors, we support our clients at every stage—from yard selection and contract negotiations to construction supervision, delivery, and post-delivery matters.

Our holistic shipbuilding brokerage approach, encompassing technical, commercial, financial, and legal aspects, ensures reliable execution and long-term value for our clients.

# NEWBUILDING EQUIPMENT

Since its establishment in 1989, PANASIA has become a leading global provider of eco-friendly and energy-efficient solutions, focusing on air quality, water quality, and hydrogen business. Their commitment to environmental sustainability has led them to develop innovative technologies that promote harmony with nature, fostering partnerships with companies both domestically and across Asia, eventually expanding their reach worldwide. By prioritizing eco-friendly technologies, PANASIA continues to tackle new challenges and contribute to a greener future for our planet.

## OUR SOLUTIONS

### Product Range:

- Carbon Capture System (CCUS)
- CEMS
- DE Sox Systems

**becker** marine systems

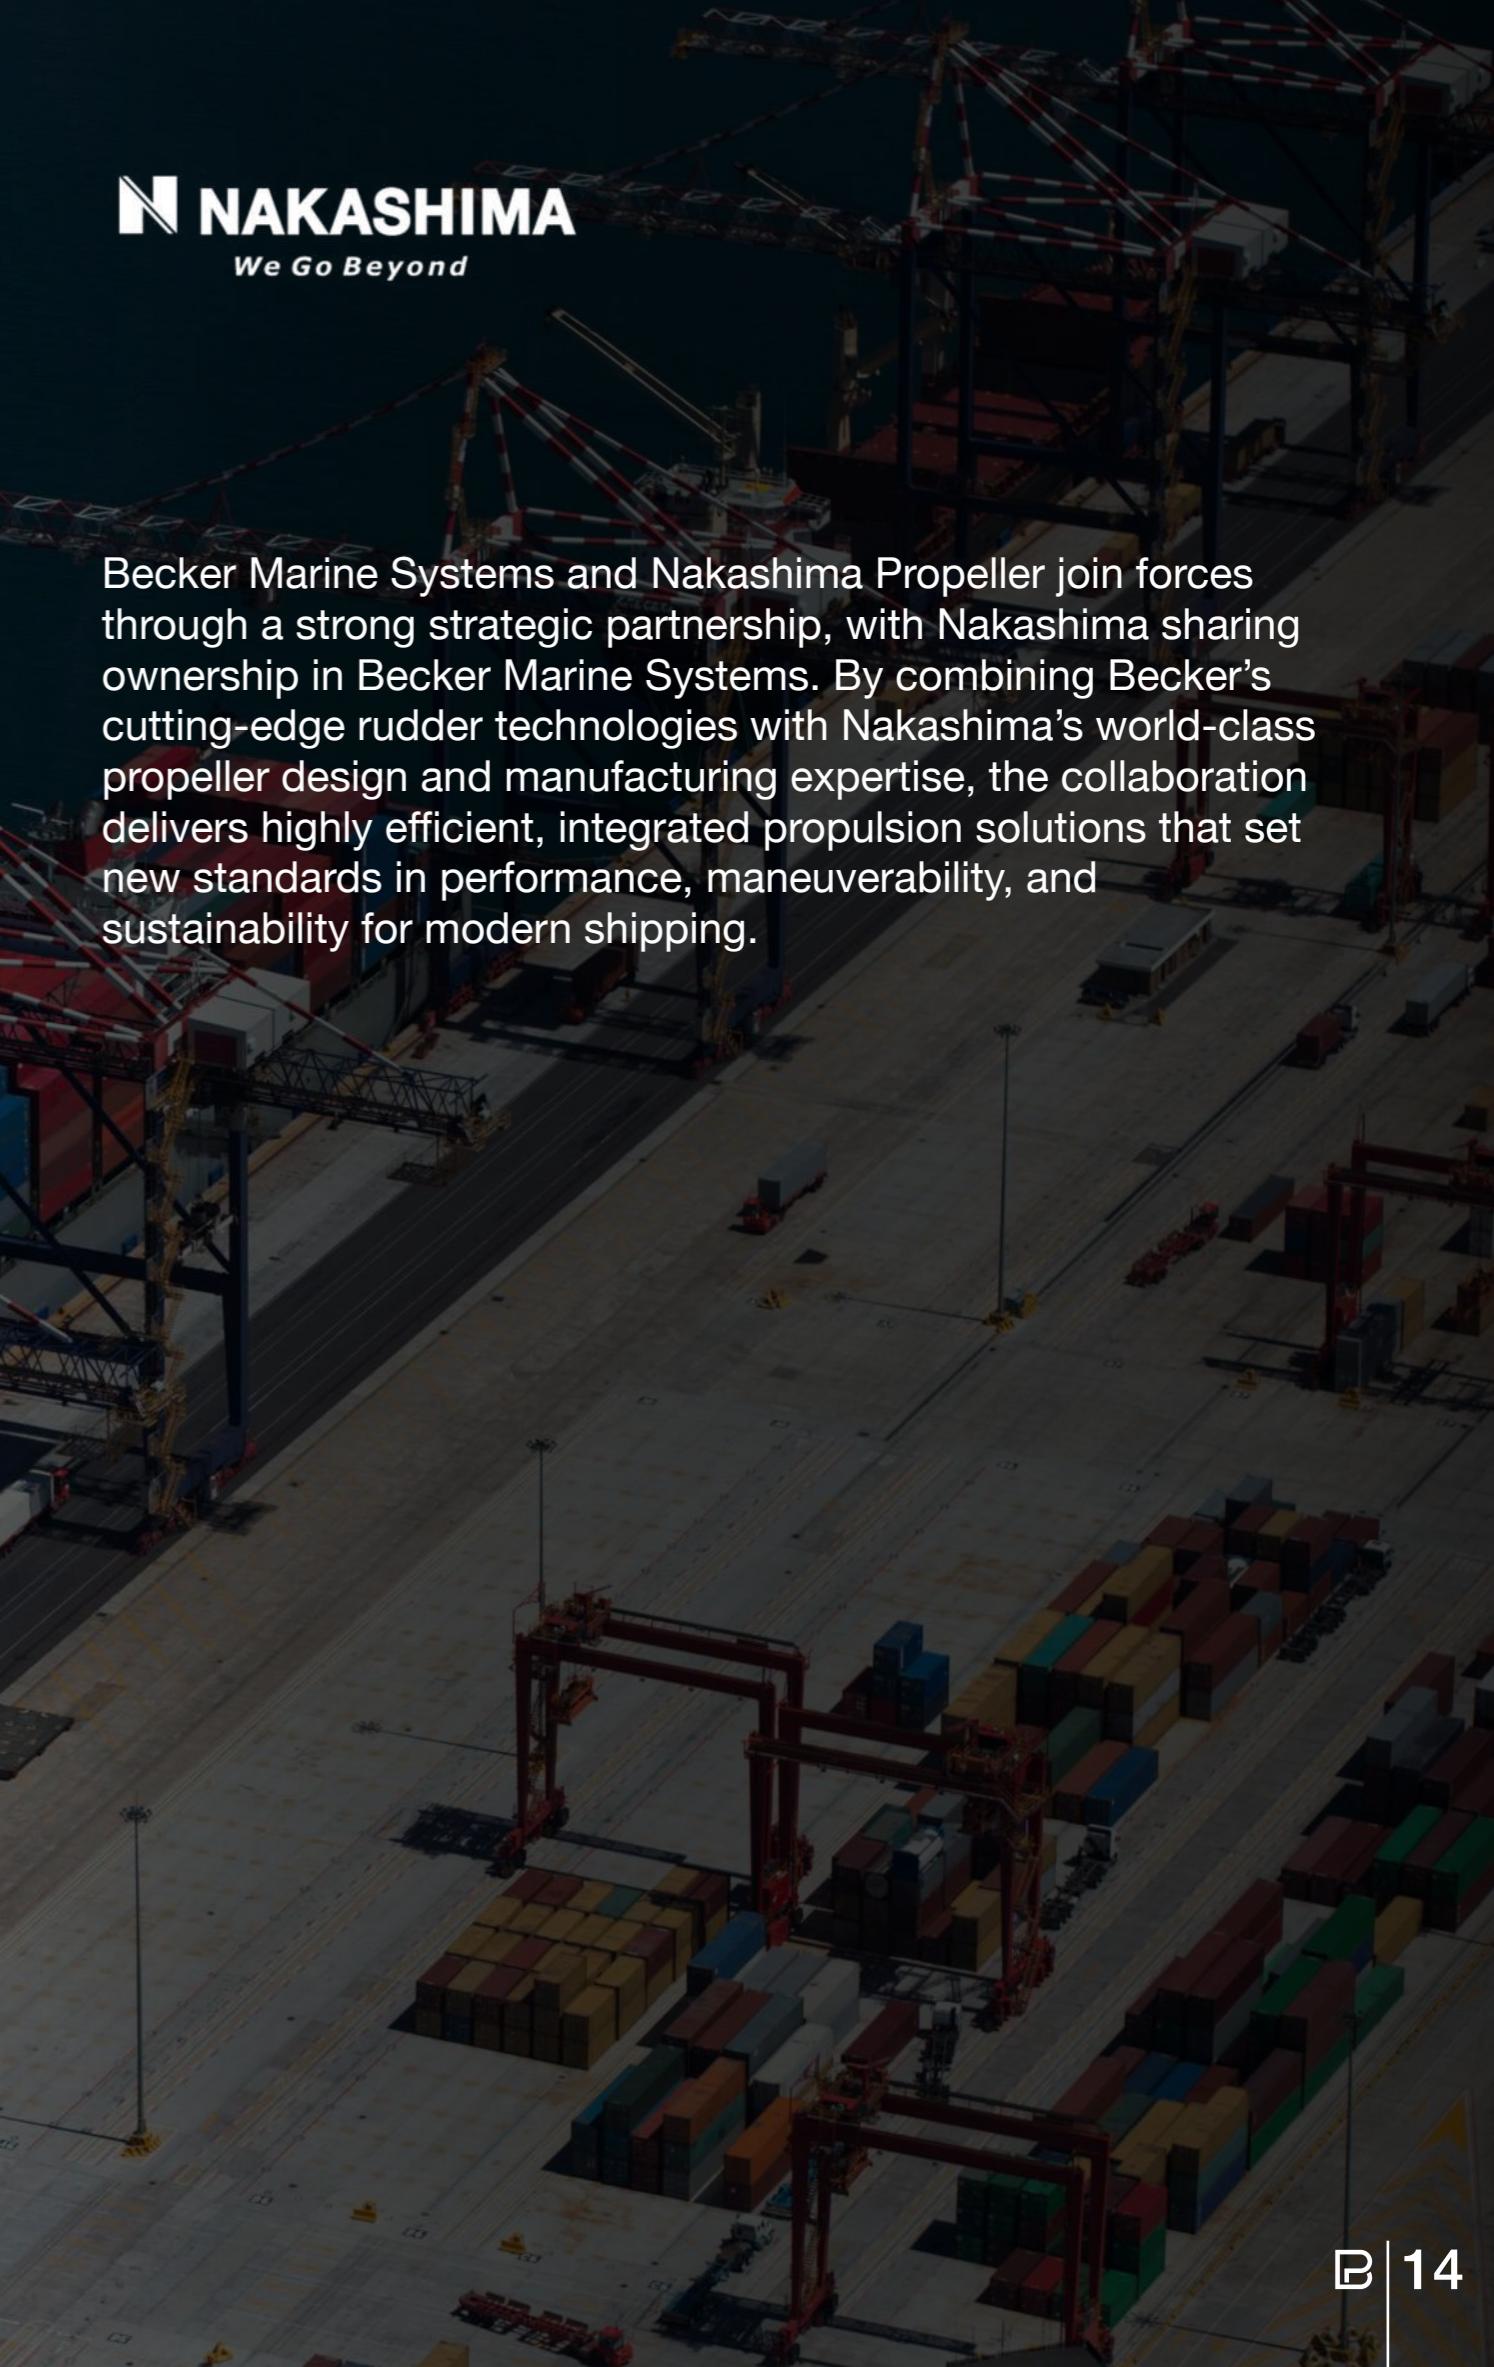

Founded in 1946 by Willi Becker, Becker Marine Systems has grown into the market leader for maneuvering systems and energy-saving devices in the maritime industry. With a strong focus on specialized rudder solutions for challenging operating conditions, such as those found on dredger vessels, Becker Marine Systems has established a reputation for excellence and innovation. Their team of professionals works tirelessly to develop new products and technical solutions for customers, ensuring optimal vessel performance and environmental sustainability.

With products like the Becker Twist Rudder and the Becker Mewis Duct, a triumph in sustainable shipping, has seen over 1,000 units sold, facilitating a remarkable reduction of over 4.0 million tons of CO<sub>2</sub> emissions on our oceans. Becker Marine Systems stands at the forefront of environmental stewardship, providing solutions that not only enhance vessel performance but also contribute significantly to a greener and more sustainable maritime future.

## OUR SOLUTIONS

- Becker Mewis Duct
- Becker Mewis Twisted Duct
- Becker Rudders
- NAKASHIMA Propellers
- NAKASHIMA ESD Devices ( PBCF & Propeller Cap)

**NAKASHIMA**  
We Go Beyond

Becker Marine Systems and Nakashima Propeller join forces through a strong strategic partnership, with Nakashima sharing ownership in Becker Marine Systems. By combining Becker's cutting-edge rudder technologies with Nakashima's world-class propeller design and manufacturing expertise, the collaboration delivers highly efficient, integrated propulsion solutions that set new standards in performance, maneuverability, and sustainability for modern shipping.

Dealfeng New Energy Technology Ltd is a clean energy technology enterprise integrating the R&D, manufacturing and turnkey retro-fit project of marine wind assisted propulsion system - Rotor Sail.

With a scientific quality management system and the spirit of “innovation, stability and progress”, Deal Eng. New Energy guarantee the high standard, reliability, and stability of the designs & projects, strengthen the production management and strictly control the quality, and make continuous efforts to help accelerate the decarbonization process for global shipping industry, building a greener sustainable future. The know-how and expertise provide owners reliable support and quality services; our excellent cost performance products and global service system ensure customers sustainable competitive advantages.

Dealfeng New Energy Technology Ltd Rotor Sail System use Magnus effect to harness wind power to help drive ships, achieve fuel savings and carbon reductions for ships and improve the energy efficiency EEDI, EEXI and the CII achieving annual fuel saving of 5%-20%.

HLB Networks Co. Ltd. was founded in 2009, leveraging 50 years of experience in the lifeboats field. The company focuses on meeting customer needs through manufacturing technology and safety services, adhering to IMO/SOLAS regulations MSC/Cir 1206. Their commitment to customer satisfaction is reflected in their global service networks, ensuring quality and safety across the industry.

## OUR SOLUTIONS

- Lifeboat and davit maintenance
- Repair and refurbishment
- Supplying genuine spare parts
- GRP – GRE pipes
- Service engineer training

As the exclusive representatives of Eco Service in Greece and Cyprus, we mark a significant step forward in our commitment to delivering innovative, efficient, and sustainable solutions to our clients.

These VFD systems are designed to optimize the performance of Sea Water Pumps and Engine Room Fans, leading to substantial reductions in energy consumption and operational costs for vessel operators.

This technology not only supports environmental sustainability but also improves the economic viability of maritime operations.

## OUR ADVANTAGES

- Flexibility and mobility during installation
- Reliability of the system
- Easy operation for crew
- By-pass switch in case of emergency operation
- Remote access and data logging system free

Trans Gas Solution (TGS) is a specialized engineering and solution provider focused on LNG bunkering infrastructure and eco-friendly shipping. Established in 2014, TGS supports the maritime industry with practical, safe, and cost-effective LNG solutions across the full project lifecycle. Headquartered in South Korea with a branch office in Singapore, the company serves shipowners, shipyards, and operators throughout the Asia-Pacific region. With hands-on experience in LNG bunkering vessels and government projects, TGS is a trusted partner for the implementation of reliable and efficient LNG fuel gas systems.

TGS delivers a comprehensive One-Stop Service, clearly covering the core stages of LNG fuel gas system projects.

## OUR SOLUTIONS

- Engineering design for LNG bunkering and fuel gas systems
- Procurement of cryogenic equipment from class-approved suppliers

JUNGWOO ENE has been able to achieve this growth since its inception. The highest level of R&D investment to secure a new growth engine, a management innovation mind that can predict the changes of the times and meet the needs of the market, and the trust and support of JUNGWOO ENE.

JUNGWOO ENE professional technical know-how has been formed based on rich experience and excellent technology. The company has built customer trust through success in all aspects of the project, including design, engineering, manufacturing and installation, and will continue to strive and strive to provide the optimal system that our customers need.

Environmental regulations related to carbon emissions are being strengthened around the world, and JUNGWOO has developed products essential in the new and renewable energy industry to realize NET-ZERO. Liquid hydrogen fuel supply system (LH<sub>2</sub> FGSS) is a system that safely supplies hydrogen to generators on land plants and ships as well as LNG FGSS.

## OUR SOLUTIONS

- LNG FGSS
- LH<sub>2</sub> FGSS
- V.I.P (Vacuum Insulated Pipe)
- D.W.P (Double Wall Pipe)

Seronics is a specialized technology provider focused on Ship Waste Heat Recovery Systems, dedicated to converting unused thermal energy from vessel operations into electrical power through advanced Thermoelectric Power Generation (TEG) technology. By capturing waste heat that would otherwise be lost, Seronics enables shipowners to significantly improve onboard energy efficiency and reduce emissions without impacting engine operation. In addition, Seronics offers specialized Waste Heat Recovery Systems for LNG carriers, turning thermal processes into power generation opportunities.

Seronics designs and delivers Waste Heat Recovery Systems for advanced marine applications, allowing energy harvesting from multiple high-temperature sources throughout the engine room and auxiliary infrastructure.

## OUR SOLUTIONS

### Waste Heat Recovery Systems

- Main Engines, recovering waste heat from operating temperatures of 220°C–230°C
- Generator Engines, utilizing waste heat at approximately 270°C
- Turbocharger Air Coolers, capturing recoverable heat at 180°C–230°C
- Economizers and Exhaust Gas Silencers, with source temperatures ranging from 200°C to 250°C

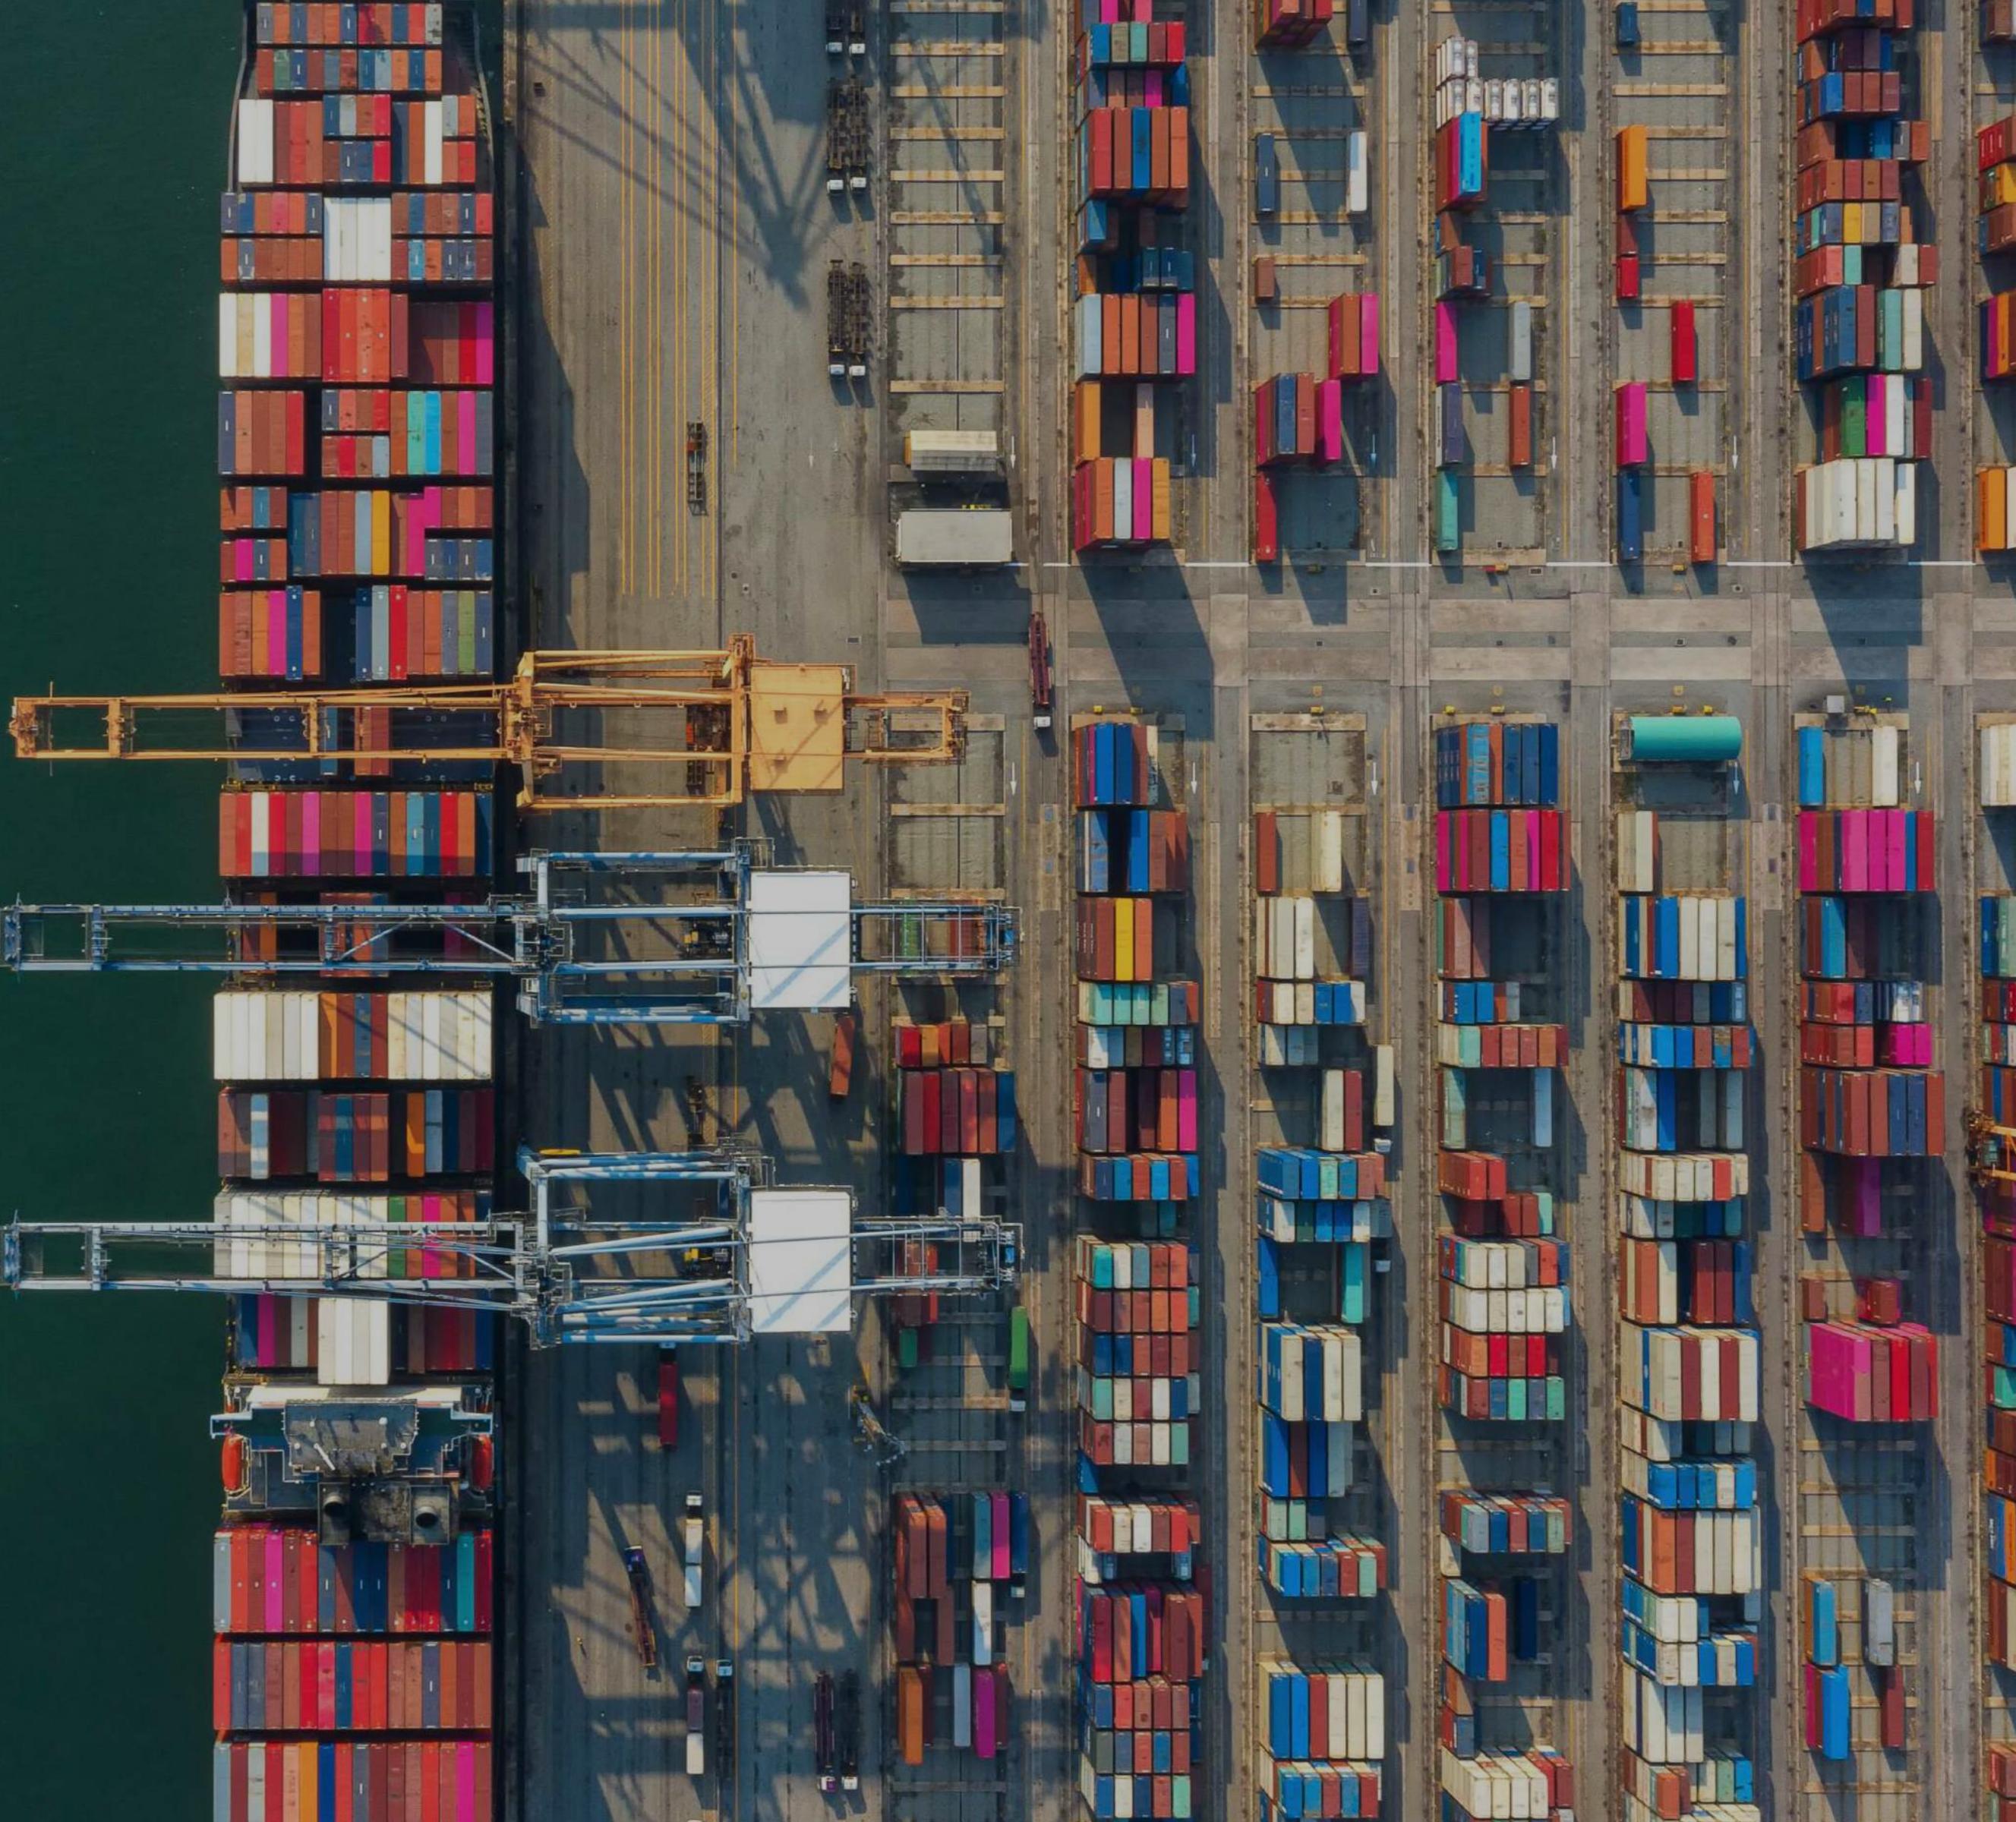

NevadaNano is a technology company specializing in continuous methane emissions monitoring, helping operators accurately detect, locate, and quantify methane leaks in real time. Through its MethaneTrack™ system, the company provides constant visibility of emissions at source, enabling safer operations, measurable emissions reduction, and improved regulatory compliance. By replacing periodic inspections with automated monitoring, NevadaNano supports faster response times and more efficient maintenance strategies.

## OUR SOLUTIONS

- MethaneTrack™ Continuous Monitoring System for real-time methane leak detection and quantification
- Close-Proximity Continuous Monitoring™, with sensors installed directly on or near critical assets
- Intrinsically safe wireless sensors designed for hazardous environments
- Cloud-based monitoring platform with secure, encrypted data transmission
- Leak Source Isolation™ (LSI) analytics, combining gas concentration data with on-site wind measurements
- Automated alerts and actionable insights, enabling operators to prioritize repairs without manual inspections or field calibration

# MARINE PRODUCTS

# MARINE PRODUCTS AND SPARE PARTS

We provide a comprehensive range of marine products and spare parts, supported by strong industry experience and established manufacturer partnerships. Our solutions are delivered in accordance with international marine standards to meet diverse operational requirements.

Our scope includes general spare parts for a wide range of marine engine brands, supporting maintenance, repair, and overhaul activities. All spares are sourced from reputable manufacturers to ensure consistent quality, reliability, and long-term performance.

We are the exclusive representative of Panasia, a leading manufacturer of marine environmental and exhaust gas treatment systems. Through this partnership, we supply genuine Panasia spare parts, supported by dedicated regional expertise.

In addition, we supply Danfoss VFD spare parts, providing dependable solutions for motor control and energy efficiency across marine applications. Our product portfolio also includes ICCP and MGPS spares, supporting corrosion protection and biofouling prevention.

We further offer PRI products, focused on enhancing operational efficiency and performance, supplied as independent solutions to meet specific customer requirements. We also represent HLB products, strengthening our portfolio with reliable and proven marine solutions.

Supported by strong technical knowledge and long-term manufacturer relationships, we continue to serve our clients as a trusted partner in the marine industry.

Since its establishment in 1989, PANASIA has become a leading global provider of eco-friendly and energy-efficient solutions, focusing on air quality, water quality, and hydrogen business. Their commitment to environmental sustainability has led them to develop innovative technologies that promote harmony with nature, fostering partnerships with companies both domestically and across Asia, eventually expanding their reach worldwide. By prioritizing eco-friendly technologies, PANASIA continues to tackle new challenges and contribute to a greener future for our planet.

Power Research Inc. (PRI) was established in 1983 with the goal of revolutionizing fuel behavior through their proprietary chemistry, which has been validated under the stringent testing protocols of the EPA and Marpol Annex VI. This innovative company also developed a synthetic-based lubricity additive technology for the early low sulfur diesel fuels introduced in California.

Nowadays, PRI's thermal stability chemistries for VLSFO/HFO, MGO, MDO, and gasoline are trusted by over 250 commercial shipping companies and countless onshore facilities and individuals worldwide. Their products offer significant benefits, including improved vessel performance and increased fleet profitability. By adhering to international air pollution requirements and regulations like Marpol Annex VI and the U.S. Environmental Protection Agency's sulfur content mandate, PRI continues to contribute to a cleaner and more sustainable future in the shipping industry.

PRI-SOLV fuel additive can assist with improving CII by reducing sludge production 30-40 percent. Through these sludge reductions, PRI-SOLV is slightly improving SFOC.
